

Project Name: Lords Cricket Club
Client: J Coffey Construction
Duration: 16 weeks
Sector(s): Hospitality
Type(s) of work: Asbestos Removal
Structural Demolition

Our scope of works for this project was;

Demolition of 2 x spectator stands including associated link bridges and passenger lifts.

Demolition of the Full Toss bar and MCC shop.

Removal of various trees.

Careful hand demolition of the listed clocktower building.

We provided suitably skilled management and directly employed labour to undertake the contract works at sufficient resource levels to complete the project within the contract programme.

This contract presented many challenges including demolishing the stands directly situated on top of a Thames Sewer which meant careful planning and sequencing of the works as well as propping.

This project involved many phases, incorporating various structures on the site. A variety of demolition techniques and expertise were used to suit the specific requirements utilising a selection of our large demolition plant, and experienced workforce.

Strict controls were taken to ensure that the area was protected and that no person was subjected to any risk from the demolition works. Water suppression was used throughout the demolition process to eliminate the release of dust.

This project was completed on time, with no complaints and to the satisfaction of the client. Lantern continues a solid working relationship with Vinci Construction.
